AUSTIN GETCHELL

Product Manager · Technical Strategy · Chicago Area / Remote

(253) 232-6819 · Austin.Getchell@gmail.com · Wheaton, IL

PROFESSIONAL SUMMARY

Product-minded technology professional with 14+ years of experience combining business strategy with technical execution. Leading cross-functional teams to ship enterprise software at scale, from requirements and roadmap to release and adoption. Comfortable in settings from development collaboration sessions to leadership team presentations. Known for translating ambiguous problems into clear product vision, rallying stakeholders around priorities, and driving measurable outcomes.

CORE COMPETENCIES

Product Strategy & Roadmapping | Requirements & User Stories | Stakeholder Alignment | Cross-Functional Leadership API Design & Integration | UX Prototyping & Wireframing | SQL & Data Analysis | JIRA / Confluence | Agile / Hybrid Delivery

EXPERIENCE

Product & IT Project Manager — *Jul 2022 – Present*

ComPsych Corporation | Chicago, IL

- Owned end-to-end product delivery for enterprise software initiatives with budgets over $1M, maintaining excellent on-time completion rates while consistently meeting business objectives.
- Partnered with executives and business stakeholders to define product requirements, shape roadmaps, and ensure alignment between technical solutions and strategic goals.
- Drove post-launch adoption through user guides, FAQs, and structured feedback loops - increasing feature utilization and cutting user escalations significantly.
- Led cross-functional teams and vendor partners, optimizing resource allocation and reducing project delivery costs.
- Facilitated daily standups and executive-level status reporting; identified and removed blockers to keep delivery on track.
- Established and enforced PM best practices across delivery teams, improving consistency and predictability of releases.

Senior Business Systems Analyst — *Feb 2014 – Jul 2022*

ComPsych Corporation | Chicago, IL

- Acted as de facto product manager for external-facing applications serving 1M+ global users - owning requirements, prioritization, roadmap input, and release strategy.
- Translated complex business needs into actionable user stories, wireframes, and acceptance criteria; accelerated release cycles through clear, dev-ready documentation.
- Served as technology stakeholder for product enhancements, advising leadership on prioritization tradeoffs and roadmap direction across FMLA, EAP, and case management platforms.
- Conducted SQL-based analysis and reporting to surface data-driven insights that shaped executive product decisions.
- Led end-to-end testing strategy (functional, regression, UAT), delivering deployments with minimal post-release defects.
- Designed and delivered technology solutions that improved operational efficiency across a suite of enterprise healthcare platforms.

Applications Analyst — *Jun 2011 – Jan 2014*

Cognizant Technology Solutions | Abbott Park, IL

- Partnered with client teams to translate business needs into system requirements, prototypes, and functional specifications.
- Managed onshore/offshore development and testing resources, ensuring quality deliverables and adherence to project timelines.
- Reduced system defects through improved QA processes and execution of comprehensive test plans.
- Increased test coverage efficiency by streamlining communication between distributed testing teams.

EDUCATION

Bachelor of Science in Business Administration, *May 2011*

University of Arizona · Tucson, AZ

Majors: Management Information Systems & Operations Management
